

SharePoint Lab: Identifying SharePoint Farm Topology

Duration : 30 Min.

Scenario

A junior administrator needs to document the topology of a new SharePoint Server farm. You must identify and map the Web Front End (WFE), Application Server, and SQL Server database components.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Document the SharePoint farm topology, mapping active servers to WFE, Application Server, and SQL backend roles in your workspace config template.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

Validation

Once you have saved your files and are ready to submit, return to the platform dashboard and click the **"Submit Final"** button. This task is evaluated manually by the grading team.

Evaluation Rubric:

1. Correct identification of WFE and Application Server roles: 5 marks
2. Mapping of SQL Server database backend configuration: 5 marks

Total Score: 10 Marks

Important Notes

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
