

SharePoint Lab: SharePoint Group Permissions & Sharing

Duration : 30 Min.

Scenario

You need to secure a sensitive HR site collection. You must create SharePoint Groups, break permission inheritance, and assign custom access levels.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Create Owner/Member/Visitor groups, break inheritance on the library, and verify guest sharing restrictions.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

Validation

Once you have saved your files and are ready to submit, return to the platform dashboard and click the **"Submit Final"** button. This task is evaluated manually by the grading team.

Evaluation Rubric:

1. Create SharePoint groups with distinct membership roles: 3 marks
2. Break permission inheritance on target document library: 3 marks
3. Assign custom permission levels to target groups: 4 marks

Total Score: 10 Marks

Important Notes

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
