

SharePoint Lab: Basic Power Automate Flow Setup

Duration : 30 Min.

Scenario

A team needs to automate document approval notifications when a new file is uploaded to a library.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Create a Power Automate flow triggered by SharePoint item creation and configure email notifications.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

Validation

Once you have saved your files and are ready to submit, return to the platform dashboard and click the "**Submit Final**" button. This task is evaluated manually by the grading team.

Evaluation Rubric:

1. Flow trigger configuration linked to SharePoint list: 3 marks
2. Approval action step and email template layout setup: 3 marks
3. Flow execution test and run history validation: 4 marks

Total Score: 10 Marks

Important Notes

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
