

SharePoint Lab: Creating Web Applications & Site Collections

Duration : 45 Min.

Scenario

You are provisioning a new corporate intranet portal. You need to create a Web Application and configure its root Site Collection.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Central Administration Web Application provisioning, port allocation, and root Team Site collection setup.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

Validation

Once you have saved your files and are ready to submit, return to the platform dashboard and click the **"Submit Final"** button. This task is evaluated manually by the grading team.

Evaluation Rubric:

1. Web Application provisioning and IIS bindings mapping: 3 marks
2. Content Database allocation and configuration: 3 marks
3. Root Site Collection creation using modern template: 2 marks
4. Managed Paths setup for secondary departments: 2 marks

Total Score: 10 Marks

Important Notes

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
