

SharePoint Lab: User Profile Synchronization Setup

Duration : 45 Min.

Scenario

Active Directory user attribute updates are not reflecting in SharePoint. You need to configure Active Directory Import.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - User Profile Service connection setup, directory mapping, and synchronization schedules verification.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

Validation

Once you have saved your files and are ready to submit, return to the platform dashboard and click the **"Submit Final"** button. This task is evaluated manually by the grading team.

Evaluation Rubric:

1. User Profile Service connection configuration: 3 marks
2. AD import synchronization mapping configuration: 3 marks
3. Custom property mapping (e.g. Department/Title): 2 marks
4. Incremental synchronization schedule configuration: 2 marks

Total Score: 10 Marks

Important Notes

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
