

SharePoint Lab: PnP PowerShell Site Provisioning

Duration : 90 Min.

Scenario

A client needs 50 standardized project site collections provisioned, each containing lists, document libraries, and custom permission settings.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Write a PnP PowerShell script that provisions site collections, applies XML templates, and reports completion status.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

Validation

Once you have saved your files and are ready to submit, return to the platform dashboard and click the **"Submit Final"** button. This task is evaluated manually by the grading team.

Evaluation Rubric:

1. Establishing connection using PnP PowerShell: 3 marks
2. Provisioning modern site collections programmatically: 3 marks
3. Creating document libraries and custom lists: 3 marks
4. Configuring metadata columns and views: 3 marks
5. Custom permission levels mapping script: 2 marks
6. Applying PnP provisioning XML templates: 2 marks
7. Exception handling and logging configurations: 2 marks
8. Automated post-provisioning site status report: 2 marks

Total Score: 20 Marks

Important Notes

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
