

Databricks Lab : Workspace Navigation & Setup

Duration : 60 Min.

Scenario

As a Junior Data Engineer at LabsKraft, you are tasked with initializing a new workspace folder structure and metadata configuration. This workspace environment will store and track all data pipelines for your team.

Input Details

The environment has been pre-configured with the following resources: - **Workspace:** Pre-configured through KodeBuck Service credentials (DATABRICKS_HOST, DATABRICKS_TOKEN)

Username & Naming Conventions

Your candidate prefix is a combination of your username (the part of your email/login before the @ or _ symbol) and exam code. For example, if your username is student (or student_labskraft.com) and your exam code is exam123, your prefix is **student-exam123**.

You must name your resources accordingly:

- **Workspace Directory:** /Shared/<prefix>-workspace (e.g. /Shared/student-exam123-workspace)
- **Metadata File:** metadata.json placed inside the directory.

Task Objectives

1. Create Workspace Folder

- Create a directory in the workspace path /Shared/<prefix>-workspace.

2. Configure Metadata File

- Create a file named metadata.json inside the directory.
- Set its content to valid JSON containing key structural configurations for your pipelines.

Verification

Once you have performed the tasks, you can run the verification script to check your progress and receive your score. The verification system will check the actual resources in the environment.

Grading Criteria

Your performance will be evaluated based on the following test cases:

Test Case	Requirement	Marks
TC1	Directory existence (/Shared/<prefix>-workspace exists)	4 Marks
TC2	Metadata file presence (metadata.a.json exists in the folder)	4 Marks
TC3	Metadata structure validation (valid JSON content)	4 Marks
TC4	Reserved validation	4 Marks
TC5	Reserved validation	4 Marks

Total Score: 20 Marks

Important Notes

- Ensure all resource names contain your candidate username prefix in lowercase.
- Check that your script compiles cleanly and contains no syntax errors.
