

Log Analysis: Grok Pattern Field Extraction

Duration : 30 Min.

Scenario

An Logstash ingestion pipeline needs a custom Grok pattern to parse Apache access logs. Construct a valid Grok pattern.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Write the Grok pattern expression inside `'grok_pattern.txt'`.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.
6. Verify your progress by running `python run.py` locally in the terminal.

Validation

Once you have saved your files and verified your progress, return to the platform dashboard and click the **"Run Test" / "Verify"** button. This will automatically evaluate your changes and generate your score!

Grading Criteria

Your performance will be evaluated based on the following test cases:

Test Case	Requirement	Marks
TC1	grok_pattern.txt exists	3 Marks
TC2	%{IP:clientip} or %{IPV4:clientip} pattern included	4 Marks
TC3	%{NUMBER:status} or %{INT:status} pattern included	3 Marks

Total Score: 10 Marks

Important Notes

- This is an auto-evaluated question. Ensure all code edits are properly saved and the 'run.py' checks pass before submission.
