

GenAI Ops: Constrained JSON Incident Report Generator

Duration : 45 Min.

Scenario

Design a system prompt instruction that strictly forces an LLM to output valid JSON conforming to an incident report JSON schema.

Target File Location & Creation

File to Create/Update: student_workspace/system_prompt_spec.json **Input Resource File to Inspect:** student_workspace/json_schema_spec.txt

Task Objectives

Perform the following actions inside the student_workspace directory: - Inspect json_schema_spec.txt in student_workspace/. - Create or update student_workspace/system_prompt_spec.json and populate it with valid analysis results.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Open and inspect json_schema_spec.txt inside student_workspace/.
3. Create or open student_workspace/system_prompt_spec.json in student_workspace/ and record your answers.
4. Save your changes (Ctrl + S or Cmd + S).
5. Open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.
6. Verify your progress by running python run.py locally in the terminal.

Validation

Once you have saved your files and verified your progress, return to the platform dashboard and click the **"Run Test" / "Verify"** button. This will automatically evaluate your changes and generate your score!

Your performance will be evaluated based on the following test cases:

Test Case	Requirement	Marks
TC1	system_prompt_spec.json exists	3 Marks
TC2	Requires root-level JSON object wrapper	3 Marks

TC3	Mandatory keys (incident_id, severity, rca) specified	2 Marks
TC4	Prohibits markdown code block wrappers	2 Marks

Total Score: 10 Marks

Important Notes

- This is an auto-evaluated question. Ensure all code edits are properly saved and the 'run.py' checks pass before submission.
