

GenAI Ops: Reusable Operational Prompt Template System

Duration : 90 Min.

Scenario

Build an operational prompt template manager ('template_manager.py') that organizes reusable templates across 8 operational categories with variable substitution.

Target File Location & Creation

File to Create/Update: student_workspace/template_manager.py **Input Resource File to Inspect:** student_workspace/op_categories_spec.txt

Task Objectives

Perform the following actions inside the student_workspace directory: - Inspect op_categories_spec.txt in student_workspace/. - Create or update student_workspace/template_manager.py and populate it with valid analysis results.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Open and inspect op_categories_spec.txt inside student_workspace/.
3. Create or open student_workspace/template_manager.py in student_workspace/ and record your answers.
4. Save your changes (Ctrl + S or Cmd + S).
5. Open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.
6. Verify your progress by running python run.py locally in the terminal.

Validation

Once you have saved your files and verified your progress, return to the platform dashboard and click the **"Run Test" / "Verify"** button. This will automatically evaluate your changes and generate your score!

Your performance will be evaluated based on the following test cases:

Test Case	Requirement	Marks
TC1	template_manager.py is syntax-valid Python	3 Marks
TC2	Supports 8 operational categories (Incident, Log, RCA, Change, etc.)	3 Marks

TC3	Implements variable substitution engine for {placeholders}	3 Marks
TC4	Outputs valid template_library.json	3 Marks
TC5	Validates template variable completeness	2 Marks
TC6	Prevents duplicate template names	2 Marks
TC7	Provides template search by category function	2 Marks
TC8	Exports default system prompt configuration	2 Marks

Total Score: 20 Marks

Important Notes

- This is an auto-evaluated question. Ensure all code edits are properly saved and the 'run.py' checks pass before submission.
