

Incident Management Lab: ServiceNow Incident Lifecycle & Ticket Creation

Duration : 30 Min.

Scenario

An IT Service Desk analyst receives reported issues across Application, Infrastructure, and User Access tiers. You must create valid incident tickets in ServiceNow following ITIL guidelines.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Populate mandatory ticket fields (Category, CI, Short Description, Business Impact) and document state transitions from New to Resolved.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

Validation

Once you have saved your files and are ready to submit, return to the platform dashboard and click the **"Submit Final"** button. This task is evaluated manually by the grading team.

Evaluation Rubric:

1. Populating mandatory ticket fields and selecting appropriate Configuration Items (CIs): 5 marks
2. Documenting valid ticket state transitions (New -> Assigned -> In Progress -> Resolved -> Closed): 5 marks

Total Score: 10 Marks

Important Notes

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
