

Incident Management Lab: Priority, Severity & SLA Management

Duration : 30 Min.

Scenario

An incident manager must evaluate incoming production issues to differentiate between Impact and Urgency to assign correct P1-P4 classifications.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Classify 10 incident scenarios using an Impact-Urgency matrix and assign target Response and Resolution SLAs.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

Validation

Once you have saved your files and are ready to submit, return to the platform dashboard and click the "**Submit Final**" button. This task is evaluated manually by the grading team.

Evaluation Rubric:

1. Mapping Impact and Urgency metrics to determine P1-P4 priority classifications: 5 marks
2. Defining Response and Resolution SLA targets and justifying priority scoring: 5 marks

Total Score: 10 Marks

Important Notes

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
