

Incident Management Lab: Categorization, Assignment & Escalation

Duration : 30 Min.

Scenario

Incidents are frequently misrouted to wrong resolver groups. You must audit categorization structures and routing paths.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Categorize incident scenarios, route tickets to correct support groups, and document time-based and functional escalation rules.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

Validation

Once you have saved your files and are ready to submit, return to the platform dashboard and click the **"Submit Final"** button. This task is evaluated manually by the grading team.

Evaluation Rubric:

1. Categorizing incidents by Category, Sub-Category, and CI to route to correct Resolver Groups: 5 marks
2. Defining functional and time-based escalation thresholds with timestamp logs: 5 marks

Total Score: 10 Marks

Important Notes

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
