

Incident Management Lab: Knowledge Management & Ticket Quality Audit

Duration : 30 Min.

Scenario

Service desk leads are auditing incident tickets to identify recurring issues and verify that knowledge articles (KB) are correctly linked.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Audit 10 incident tickets using a quality checklist, identify KB gaps, and evaluate closure resolution notes.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

Validation

Once you have saved your files and are ready to submit, return to the platform dashboard and click the **"Submit Final"** button. This task is evaluated manually by the grading team.

Evaluation Rubric:

1. Linking relevant Knowledge Base (KB) articles to active incident records: 4 marks
2. Auditing ticket quality for completeness, evidence attachments, and resolution accuracy: 3 marks
3. Identifying recurring incident patterns and highlighting Knowledge Base gaps: 3 marks

Total Score: 10 Marks

Important Notes

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
