

Incident Management Lab: Post Incident Review (PIR) & Problem Management

Duration : 30 Min.

Scenario

Following a major system recovery, an SRE team must conduct a Post Incident Review (PIR) to prevent recurrence.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Facilitate a PIR session, construct an outage timeline, raise a Problem Record, and document Known Errors.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

Validation

Once you have saved your files and are ready to submit, return to the platform dashboard and click the **"Submit Final"** button. This task is evaluated manually by the grading team.

Evaluation Rubric:

1. Constructing a chronological outage timeline differentiating immediate causes from root causes: 3 marks
2. Raising linked Problem Records for recurring incidents and documenting Known Errors: 3 marks
3. Defining permanent corrective actions and assigning action item owners: 4 marks

Total Score: 10 Marks

Important Notes

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
