

Incident Management Lab: SRE Concepts, SLIs/SLOs & Error Budget Tracking

Duration : 30 Min.

Scenario

An SRE lead needs to establish Service Level Objectives (SLOs) and Error Budgets for a digital banking platform.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Define availability and latency SLIs, calculate Error Budget consumption, and review reliability trend charts.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

Validation

Once you have saved your files and are ready to submit, return to the platform dashboard and click the **"Submit Final"** button. This task is evaluated manually by the grading team.

Evaluation Rubric:

1. Defining Service Level Indicators (SLIs) and setting target Service Level Objectives (SLOs): 3 marks
2. Calculating monthly Error Budget consumption during major incident windows: 3 marks
3. Evaluating reliability trends and identifying Error Budget burn acceleration: 2 marks
4. Formulating deployment freeze rules based on Error Budget depletion: 2 marks

Total Score: 10 Marks

Important Notes

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
