

Enterprise Batch Lab: Comparing Scheduling Technologies

Duration : 30 Min.

Scenario

A microservices app requires lightweight task scheduling, whereas an enterprise reporting app needs robust calendar-based triggers. You must select the right tool.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Draft an architectural comparison mapping workloads to Spring Batch, Cron, Windows Task Scheduler, and enterprise schedulers.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

Validation

Once you have saved your files and are ready to submit, return to the platform dashboard and click the **"Submit Final"** button. This task is evaluated manually by the grading team.

Evaluation Rubric:

1. Mapping specific application requirements to appropriate schedulers: 5 marks
2. Configuring standard cron-expression patterns for complex calendar triggers: 5 marks

Total Score: 10 Marks

Important Notes

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
