

Enterprise Batch Lab: Incident Classification & Runbook Auditing

Duration : 30 Min.

Scenario

An operations center receives multiple alerts at End-of-Month. You must classify these alerts and assign remediation priorities.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Classify batch incidents by severity (P1-P4) and link them to operational runbook steps.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

Validation

Once you have saved your files and are ready to submit, return to the platform dashboard and click the **"Submit Final"** button. This task is evaluated manually by the grading team.

Evaluation Rubric:

1. Classifying batch incidents based on business impact criteria: 3 marks
2. Linking incident codes to specific recovery runbook steps: 3 marks
3. Recommending process improvements to reduce false-positive alerts: 4 marks

Total Score: 10 Marks

Important Notes

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
