

Enterprise Batch Lab: Batch Window and EOM Processing SLAs

Duration : 45 Min.

Scenario

Business operations require setting up SLA metrics for End-of-Month (EOM) batch windows.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Calculate the maximum allowable processing times and set up alert notifications for threshold breaches.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

Validation

Once you have saved your files and are ready to submit, return to the platform dashboard and click the **"Submit Final"** button. This task is evaluated manually by the grading team.

Evaluation Rubric:

1. Correct calculation of available batch window limits: 3 marks
2. Establishing alert thresholds for incremental delays: 3 marks
3. Configuring SLA warning parameters inside scheduler settings: 2 marks
4. Developing runbook templates for anticipated SLA breaches: 2 marks

Total Score: 10 Marks

Important Notes

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
