

Enterprise Batch Lab: Designing JCL DD Statement Overrides

Duration : 45 Min.

Scenario

Testing a mainframe utility requires redirecting input data streams to test datasets without editing the base JCL member.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Define JCL DD override statements in a test wrapper job.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

Validation

Once you have saved your files and are ready to submit, return to the platform dashboard and click the **"Submit Final"** button. This task is evaluated manually by the grading team.

Evaluation Rubric:

1. Structuring DD statements to redirect file allocations: 3 marks
2. Applying system parameter variables inside JCL scripts: 3 marks
3. Ensuring dataset disposition (DISP) settings prevent lock conflicts: 2 marks
4. Verifying execution return codes (Max RC=0): 2 marks

Total Score: 10 Marks

Important Notes

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
