

Middleware Lab: Component Mapping in Multi-Tier Architectures

Duration : 30 Min.

Scenario

An integration architect must document how client HTTP requests flow across the web tier, application tier, and database tier.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Draft a diagram or documentation mapping the distinct roles of Web Servers, Servlet Containers, and Application Servers.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press **Ctrl + S** (Windows) or **Cmd + S** (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

Validation

Once you have saved your files and are ready to submit, return to the platform dashboard and click the **"Submit Final"** button. This task is evaluated manually by the grading team.

Evaluation Rubric:

1. Distinguishing between Web Server (Nginx/Apache) and Application Server (WebLogic/Tomcat) roles: 5 marks
2. Mapping the end-to-end request-response flow across the architecture: 5 marks

Total Score: 10 Marks

Important Notes

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
