

Log Analysis: Dashboard Panel Visualizations & Health Metrics

Duration : 90 Min.

Scenario

Design an observability dashboard layout containing field-based visualizations for error rate, throughput, transaction latency, and service health status.

Target File Location & Creation

File to Create/Update: student_workspace/solution.json **Input Resource File to Inspect:** student_workspace/trace_spans.json

Task Objectives

Perform the following actions inside the student_workspace directory: - Inspect trace_spans.json in student_workspace/. - Edit solution.json and record the required log analytics or findings.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Open and inspect trace_spans.json inside student_workspace/.
3. Open solution.json in student_workspace/ and perform the required modifications.
4. Save your changes (Ctrl + S or Cmd + S).
5. Open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.
6. Verify your progress by running python run.py locally in the terminal.

Validation

Once you have saved your files and verified your progress, return to the platform dashboard and click the **"Run Test" / "Verify"** button. This will automatically evaluate your changes and generate your score!

Grading Criteria

Your performance will be evaluated based on the following test cases:

Test Case	Requirement	Marks
TC1	dashboard_config.json exists	3 Marks

TC2	Error rate panel query and timeseries chart configured	3 Marks
TC3	Throughput panel (requests per minute) configured	3 Marks
TC4	Latency heatmap / bar chart panel configured	3 Marks
TC5	Service health status gauge panel included	2 Marks
TC6	Alert notification channel mapped	2 Marks
TC7	Auto-refresh interval set to 30s/1m	2 Marks
TC8	Dashboard grid layout coordinates specified	2 Marks

Total Score: 20 Marks

Important Notes

- This is an auto-evaluated question. Ensure all code edits are properly saved and the 'run.py' checks pass before submission.
