

Log Analysis: ISO 8601 & Unix Epoch Timestamp Standardization

Duration : 45 Min.

Scenario

A log aggregator receives timestamps in mixed formats (Unix Epoch, ISO 8601, EST local time). Standardize all timestamps to ISO 8601 UTC format.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Complete conversion functions in `timestamp_converter.js`.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.
6. Verify your progress by running `python run.py` locally in the terminal.

Validation

Once you have saved your files and verified your progress, return to the platform dashboard and click the **"Run Test" / "Verify"** button. This will automatically evaluate your changes and generate your score!

Grading Criteria

Your performance will be evaluated based on the following test cases:

Test Case	Requirement	Marks
TC1	timestamp_converter.js is syntax-valid JS	3 Marks
TC2	Unix epoch converted to ISO string correctly	3 Marks
TC3	Local timezone offsets adjusted to UTC Z format	2 Marks

TC4	Returns string ending with 'Z' or '+00:00'	2 Marks
-----	--	---------

Total Score: 10 Marks

Important Notes

- This is an auto-evaluated question. Ensure all code edits are properly saved and the 'run.py' checks pass before submission.
