

Basic Code Analysis: Service Ownership & Module Mapping

Duration : 30 Min.

Scenario

An incident alert is raised in the billing service. You must look up the service metadata registry to identify the responsible engineering team and contact slack channel.

Target File Location & Creation

File to Create/Update: student_workspace/solution.json **Input Resource File to Inspect:** student_workspace/billing_service.log

Task Objectives

Perform the following actions inside the student_workspace directory: - Populate contact details for the owner team of 'billing-service' in your 'solution.json'.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Open and inspect billing_service.log inside student_workspace/.
3. Open solution.json in student_workspace/ and perform the required modifications.
4. Save your changes (Ctrl + S or Cmd + S).
5. Open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.
6. Verify your progress by running python run.py locally in the terminal.

Validation

Once you have saved your files and verified your progress, return to the platform dashboard and click the **"Run Test" / "Verify"** button. This will automatically evaluate your changes and generate your score!

Grading Criteria

Test Case	Requirement	Marks
TC1	solution.json exists	3 Marks
TC2	Correct team name mapped	4 Marks
TC3	Correct contact slack channel mapped	3 Marks

Total Score: 10 Marks

Important Notes

- This is an auto-evaluated question. Ensure all code edits are properly saved and the 'run.py' checks pass before submission.
