

Observability Lab: Dynatrace Smartscape Topology & PurePath Navigation

Duration : 30 Min.

Scenario

An enterprise Java application suffers intermittent memory leaks. You need to navigate Dynatrace Smartscape and PurePath to trace the failure.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Map service dependencies in Dynatrace Smartscape and analyze PurePath code-level execution traces.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

Validation

Once you have saved your files and are ready to submit, return to the platform dashboard and click the **"Submit Final"** button. This task is evaluated manually by the grading team.

Evaluation Rubric:

1. Navigating Dynatrace Smartscape topology views from Problem Cards to host services: 5 marks
2. Tracing code-level request execution paths using Dynatrace PurePath: 5 marks

Total Score: 10 Marks

Important Notes

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
