

Observability Lab: Grafana Panel Development & Threshold Configurations

Duration : 30 Min.

Scenario

You are building a custom Grafana dashboard for an e-commerce platform. You must configure panel transformations and template variables.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Configure Grafana panel query editors, add metric transformations, set threshold colors, and create dynamic template variables.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

Validation

Once you have saved your files and are ready to submit, return to the platform dashboard and click the **"Submit Final"** button. This task is evaluated manually by the grading team.

Evaluation Rubric:

1. Configuring query editors and metric transformations across dashboard panels: 4 marks
2. Defining warning/critical threshold colors for latency and CPU panels: 3 marks
3. Creating dynamic dashboard template variables for environment filtering: 3 marks

Total Score: 10 Marks

Important Notes

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
