

Observability Lab: AWS CloudWatch & X-Ray Distributed Trace Correlation

Duration : 30 Min.

Scenario

A serverless microservice running on AWS Lambda experiences intermittent cold-start delays and timeout exceptions.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Query CloudWatch Logs Insights, trace request execution segments in AWS X-Ray, and correlate log events with trace IDs.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

Validation

Once you have saved your files and are ready to submit, return to the platform dashboard and click the **"Submit Final"** button. This task is evaluated manually by the grading team.

Evaluation Rubric:

1. Querying AWS CloudWatch Logs Insights using field extraction and stats: 4 marks
2. Navigating AWS X-Ray service maps and segment waterfall diagrams: 3 marks
3. Correlating CloudWatch log streams with X-Ray trace IDs: 3 marks

Total Score: 10 Marks

Important Notes

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
