

# Observability Lab: Runbook Integration & Incident Escalation Evidence

---

Duration : 45 Min.

## Scenario

---

During an escalation, incident response engineers lack documented troubleshooting procedures and evidence collection workflows.

## Task Objectives

---

Perform the following actions inside the `student_workspace` directory: - Establish dashboard governance standards, embed operational runbooks into alert definitions, and standardize incident evidence collection.

## Instructions to Perform the Task

---

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

## Validation

---

Once you have saved your files and are ready to submit, return to the platform dashboard and click the **"Submit Final"** button. This task is evaluated manually by the grading team.

## Evaluation Rubric:

---

1. Establishing dashboard naming and tagging governance standards: 2 marks
2. Embedding operational runbook links into alert notification payloads: 2 marks
3. Standardizing evidence capture requirements for post-mortem reporting: 2 marks
4. Configuring cross-team collaboration channels (Slack/Teams) for automated alerts: 2 marks
5. Defining escalation paths and handoff procedures for multi-tier support: 2 marks

**Total Score: 10 Marks**

## Important Notes

---

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
