

GenAI Ops: AI Assistance Patterns in Operations

Duration : 30 Min.

Scenario

Operational support teams use AI for Summarization, Classification, Generation, and Retrieval. Categorize 4 operational incident scenarios into their correct AI assistance pattern.

Target File Location & Creation

File to Create/Update: student_workspace/solution.json **Input Resource File to Inspect:** student_workspace/operational_scenarios.txt

Task Objectives

Perform the following actions inside the student_workspace directory: - Inspect operational_scenarios.txt in student_workspace/. - Create or update student_workspace/solution.json and populate it with valid analysis results.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Open and inspect operational_scenarios.txt inside student_workspace/.
3. Create or open student_workspace/solution.json in student_workspace/ and record your answers.
4. Save your changes (Ctrl + S or Cmd + S).
5. Open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.
6. Verify your progress by running python run.py locally in the terminal.

Validation

Once you have saved your files and verified your progress, return to the platform dashboard and click the **"Run Test" / "Verify"** button. This will automatically evaluate your changes and generate your score!

Your performance will be evaluated based on the following test cases:

Test Case	Requirement	Marks
TC1	solution.json exists	3 Marks
TC2	Incident ticket triage mapped to Summarization/Classification	4 Marks
TC3	Runbook lookup mapped to Retrieval (RAG)	3 Marks

Total Score: 10 Marks

Important Notes

- This is an auto-evaluated question. Ensure all code edits are properly saved and the 'run.py' checks pass before submission.
