

GenAI Ops: Recognizing AI Hallucinations in CLI Commands

Duration : 30 Min.

Scenario

An AI assistant generated a list of Linux bash commands for troubleshooting. Review the list, detect fabricated CLI flags, and extract non-existent commands.

Target File Location & Creation

File to Create/Update: `student_workspace/command_audit.json` **Input Resource File to Inspect:** `student_workspace/ai_suggested_commands.txt`

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Inspect `ai_suggested_commands.txt` in `student_workspace/`. - Create or update `student_workspace/command_audit.json` and populate it with valid analysis results.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Open and inspect `ai_suggested_commands.txt` inside `student_workspace/`.
3. Create or open `student_workspace/command_audit.json` in `student_workspace/` and record your answers.
4. Save your changes (Ctrl + S or Cmd + S).
5. Open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.
6. Verify your progress by running `python run.py` locally in the terminal.

Validation

Once you have saved your files and verified your progress, return to the platform dashboard and click the **"Run Test" / "Verify"** button. This will automatically evaluate your changes and generate your score!

Your performance will be evaluated based on the following test cases:

Test Case	Requirement	Marks
TC1	<code>command_audit.json</code> exists	3 Marks
TC2	Fabricated flag <code>'--force-push-all'</code> identified	4 Marks

TC3	Non-existent command 'sysclean-all' marked as hallucinated	3 Marks
-----	--	---------

Total Score: 10 Marks

Important Notes

- This is an auto-evaluated question. Ensure all code edits are properly saved and the 'run.py' checks pass before submission.
