

# GenAI Ops: AI Operational Support & Incident Ticket Summarization

Duration : 30 Min.

## Scenario

Use AI prompt output rules to summarize a lengthy multi-page incident support ticket. Extract incident severity, impacted microservices, and root cause.

## Target File Location & Creation

**File to Create/Update:** student\_workspace/incident\_summary.json **Input Resource File to Inspect:** student\_workspace/raw\_incident\_ticket.txt

## Task Objectives

Perform the following actions inside the student\_workspace directory: - Inspect raw\_incident\_ticket.txt in student\_workspace/. - Create or update student\_workspace/incident\_summary.json and populate it with valid analysis results.

## Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Open and inspect raw\_incident\_ticket.txt inside student\_workspace/.
3. Create or open student\_workspace/incident\_summary.json in student\_workspace/ and record your answers.
4. Save your changes (Ctrl + S or Cmd + S).
5. Open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.
6. Verify your progress by running python run.py locally in the terminal.

## Validation

Once you have saved your files and verified your progress, return to the platform dashboard and click the **"Run Test" / "Verify"** button. This will automatically evaluate your changes and generate your score!

Your performance will be evaluated based on the following test cases:

| Test Case | Requirement                                | Marks   |
|-----------|--------------------------------------------|---------|
| TC1       | incident_summary.json exists               | 3 Marks |
| TC2       | Severity correctly extracted (P1/CRITICAL) | 4 Marks |

|     |                                                      |         |
|-----|------------------------------------------------------|---------|
| TC3 | Impacted service name ('payment-gateway') identified | 3 Marks |
|-----|------------------------------------------------------|---------|

Total Score: 10 Marks

### Important Notes

---

- This is an auto-evaluated question. Ensure all code edits are properly saved and the 'run.py' checks pass before submission.
