

JVM Lab: JVM Unified GC Logging

Duration : 30 Min.

Scenario

The operational team needs visibility into heap allocations and garbage collection execution timelines to debug memory issues.

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Enable JVM unified GC logging (`-Xlog:gc*`) with log rotation parameters, and analyze Eden/Tenured promotion events in the workspace logs.

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Navigate to and click the specific files mentioned in the Task Objectives.
3. Make the necessary code edits in the editor.
4. Press `Ctrl + S` (Windows) or `Cmd + S` (Mac) to save your changes.
5. If you need to run commands, open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.

Validation

Once you have saved your files and are ready to submit, return to the platform dashboard and click the **"Submit Final"** button. This task is evaluated manually by the grading team.

Evaluation Rubric:

1. Unified GC logging parameters setup (`-Xlog:gc*`): 5 marks
2. Eden/Tenured space transitions and pause spikes analysis report: 5 marks

Total Score: 10 Marks

Important Notes

- This is a manually evaluated question.
- Ensure all logs and configurations are fully saved in your workspace folder before submitting.
