

Basic Code Analysis: Repository Structure & Component Identification

Duration : 30 Min.

Scenario

A support ticket states that build config files are missing. You must create the missing descriptor files in `student_workspace/` and fill out the technology mapping.

Target File Location & Creation

File to Create/Update: `student_workspace/pom.xml`, `student_workspace/build.gradle`, `student_workspace/solution.json`

Task Objectives

Perform the following actions inside the `student_workspace` directory: - Create 'pom.xml' and 'build.gradle' files inside 'student_workspace/'. Then create 'solution.json' inside 'student_workspace/' mapping each descriptor file key to its build tool ('Maven', 'Gradle').

Instructions to Perform the Task

1. When your workspace loads in **VS Code**, use the **Explorer** panel on the left to locate your files.
2. Open and inspect the scenario input files in `student_workspace/`.
3. Create/update the file `student_workspace/pom.xml`, `student_workspace/build.gradle`, `student_workspace/solution.json` and populate it with valid parameters and configurations.
4. Save your changes (Ctrl + S or Cmd + S).
5. Open the built-in terminal by clicking **Terminal > New Terminal** from the top menu.
6. Verify your work by running `python run.py` in the terminal before submitting.

Validation

Once you have saved your files and verified your progress, return to the platform dashboard and click the **"Run Test" / "Verify"** button. This will automatically evaluate your changes and generate your score!

Grading Criteria

Your performance will be evaluated based on the following test cases:

Test Case	Requirement	Marks
-----------	-------------	-------

TC1	solution.json exists in student_workspace/ and is valid JSON	3 Marks
TC2	pom.xml correctly created and mapped to Maven	4 Marks
TC3	build.gradle correctly created and mapped to Gradle	3 Marks

Total Score: 10 Marks

Important Notes

- This is an auto-evaluated question. Ensure all code edits are properly saved and the 'run.py' checks pass before submission.
