

NJS_Q04_E: PM2 Cluster Configuration

Difficulty: EASY

Scenario

A Node.js web application is exhibiting runtime anomalies or configuration errors in production. You are tasked with writing clean, async, and correct JavaScript code to solve the requirements.

Username & Naming Conventions

- Resources must utilize your candidate suffix prefix (<username>-<exam_code>).

Task Objectives

- Node.js Optimization & Code Resolution:** Build a PM2 ecosystem configuration file to configure instances, memory limit, and log routing.
- Ensure your changes pass all local verification tests.

Verification

- Local run test script `run.py` can be executed to verify local workspace properties.
- Central validation runs queries against the live workspace to verify integration.

Grading Criteria

- TC1: File `ecosystem.config.js` exists in workspace** (4 Marks)
- TC2: Ecosystem format is valid Javascript module export** (4 Marks)
- TC3: Correct application execution mode configured (cluster)** (4 Marks)
- TC4: Configured 2 instances with memory restart limit of 150M** (4 Marks)
- TC5: Configured custom error/output log file paths** (4 Marks)

Important Notes

- Always check that your syntax compiles without errors.
